Continuation of 10. Other: Upon carefully reviewing the specification, the following observations are made: a) there is no support in the specification for the limitation "wherein a radial width ... said central area" in claims 73 and 80". Therefore, it is unclear how a radial width is determined; b) there is no support in the specification for the limitation of "independently adjustable pressures" or similar languages in claims 12, 38, 45, 49, 68, 70, 71. Please note that in col. 5, lines 35-43, "variable independently" language was found to describe the relationship between F1 (pressing force on wafer) and F2 (pressing force on presser ring 3). These are not pressing forces on concentric areas A1-3 on the wafer. Therefore, it is unclear what is meant by "independently adjustable pressure". Thus, Hoshizaki still reads on the claims.
